*Journal of Elasticity*

# Contents of Volume 30 (1993)

**Vol. 30 No. 1 January 1993**

A.J. Roberts: The invariant manifold of beam deformations. Part 1: The simple circular rod 1
Y. Shenker and J.J. Roseman: On the Saint-Venant principle in the case of infinite energy 55
A. Chrzęszczyk: Well-posedness of the equations of generalized thermoelasticity 69
A. Montanaro: On heat flux in simple media 81

*Research note*
N.G. Stephen: On edge effects for the semi-infinite plate 103

**Vol. 30 No. 2 February 1993**

V.A. Popov: Free vibrations of a thin rectangular plate 107
Z. Zhou: Coupled shear-torsional motion of a rubber support system 123

*Research note*
M.M. Mehrabadi, S.C. Cowin, and C.O. Horgan: Strain energy density bounds for linear anisotropic elastic materials 191

**Vol. 30 No. 3 March 1993**

M.K. Kuo: Stress intensity factors for a semi-infinite plane crack under a pair of point forces on the faces 197
X. Markenscoff and L. Ni: The near-field of an accelerating dislocation in an anisotropic solid 211
J. Ignaczak and C.R.A. Rao: Stress characterization of elastodynamics with continuously distributed defects 219
J.G. Murphy: Inflation and eversion of spherical shells of a special compressible material 251
T.C.T. Ting: On the orthogonal, Hermitian and positive definite properties of the matrices $i\,B^{-1}\bar{B}$ and $-iA^{-1}\bar{A}$ in anisotropic elasticity 277

*Errata*
I. Demir, J.P. Hirth and H.M. Zbib: The Somigliana ring dislocation 285

*Kluwer LaTeX style file: Instructions for authors* 287
